Art Unit: 1797

Claims 1 – 12 are rejected under 35 USC Sec 103(a) as obvious over WO 02/18280 to RECKITT BENCKISER. RECKITT BENCKISER discloses water-softening products comprising a container which is permeable to water and to calcium ions but retains the modifying agent. The modifying agent is a substantially water-insoluble softening agent able to bind calcium ions. This document does not, however, disclose the articles being held with packaging having a moisture vapor transmission rate of less than $30\text{g/m}^2/\text{day}$. However, it is known to package detergent and water softening tablets in materials having such a vapor transmission rate, as shown by any one of WO 98/40464 to UNILEVER (page 2 line 6 to page 5 line 8), DE 19937428 to HENKEL (English abstract), US 2001/0009892 to BONSALL (page 4 paragraphs [0054] to [0061] and page 10 paragraph [0164] to page 11 paragraph [0176]) and US 2002/0004472 to HOLDERBAUM (paragraph [0356]). As such, it would have been obvious to have held the disclosed articles in packaging having the recited vapor transmission rate because it was known that such packaging would increase the shelf-life of the products shown in WO 02/18280. It is also noted that the exemplified packaging consists of polyethylene bags, which are extremely well known as being used in improving the shelf-life of products. Per claim 12, a sachet is a conventional container made from film, so selection of this type of container would have been obvious.

Objection is made to the specification for failure to clearly denote "Amberlite" and "Duolite" on page 9 as registered trademarks. Amendment to Amberlite® and Duolite® is suggested.
